# SERVICES

## ENGINEERING

AGM delivers complete project solutions for our customers through diverse yet integrated multi-discipline engineering capabilities encompassing conceptual and feasibility studies, project definition, detailed engineering and construction management.

## PROCUREMENT

AGM procurement and inspection services ensures our clients the timely delivery of the right equipment and materials to the project site. We secure the proper documentation needed while ensuring the delivery of a cost effective and predictable project.

## PLANT SERVICES

AGM maintains highly skilled personnel across all disciplines to fulfill our clients' needs for staff augmentation when needed. We also provide plant surveying crews that utilize the latest equipment and technology.

## CONSTRUCTION MANAGEMENT

AGM's construction specialty staff, combining both in depth experience and knowledge of the area, assure a safe and cost effective project.

## CONSULTING SERVICES

AGM provides HSSE consultancy and training through our sister company, Process Safety & Reliability Group (PSRG), Inc., a full-service process safety, security, reliability, environment, health, and risk management firm.

Our uniquely-skilled staff averages 29 years of experience and hands-on knowledge of regulatory requirements, industry best practices, and lessons learned. By providing innovative, optimum solutions tailored to individual customer requirements, we help facilities, ports, and vessels at home and abroad, onshore and offshore.

AGM assists our clients with the evaluation of contractors through our consultant services.
